

a Retained locator checks | 9,144 field records

Stored-text matching in the retained coordinate audit

Single linear scale: 0 to 9,144 records

177 records in other states

Locator state	Records	%
Recorded span matched	8,967	98.06
Exact span added on recorded page	26	0.28
Exact page or span added	22	0.24
Quote found on multiple pages	2	0.02
Image-transcription locator not rechecked	121	1.32
Page-only reference	6	0.07

b Exact text anchors | 9,015 field records

8,967 recorded spans + 26 same-page spans + 22 page/span updates

c Structure and associated-source coverage

Release structure

1,524 authorizations × 6 fields
11,120 positive label memberships
Unique keys; allowed codes; explicit states
Joins, counts and data checksums: pass

Associated-source relationships

65 field records across 20 authorizations
145 bridge rows; 43 distinct text locations
Continuity and integration relationships
Scope and configuration recorded

Text anchors are field-linked records; source passages can recur across fields.
Targeted semantic review: 12 field records; 6 source references (Table 1).
